

# The Consumer's Green Wine Shopping List™

**Winners of the 2008 International Green Wine Competition  
Held May 5, 2008 in Santa Rosa, California**

---

## **WHAT WINES QUALIFIED TO COMPETE IN THE 2008 INTERNATIONAL GREEN WINE COMPETITION?**

Table, sparkling, fortified, fruit, and specialty wines produced in any of the wine producing regions of the world and that meet applicable Class definitions and legal requirements for sale in the United States are eligible for entry.

### **Class 1: Certified Biodynamically Grown**

Wines made from grapes certified by Biodyvin (France) or Demeter (USA or International). Wines entered in this category must be made from biodynamically grown grapes from certified vineyards. Acceptable third-party agencies include Biodyvin (France), and Demeter (USA or International). Proof of current certification must accompany your entry.

In addition to being certified organic, grapes grown in these vineyards must follow specified vineyard practices and in winemaking must adhere to required standards, such as using no genetically modified yeasts or enzymes.

### **Class 2: Certified Organic**

Wines made from certified organically grown grapes. Wines in this category must be made from grapes grown in certified organic vineyards. This means that grapes are grown without the use of chemical pesticides, herbicides, and fertilizers. Sulfites may be added, but only up to 100 parts per million. Certification may be given by an accredited third party agency, such as CCOF, Oregon TILTH, or France's ECOCERT. A copy of your certification from CCOF, Oregon Tilth, France's ECOCERT, or your nation's organic certifying agency. Such certification must be up to date and a copy must be included with your entry.

A certifier statement on your label (such as USDA Organic) may also be used as proof for this category.

### **Class 3: Transitional & Third Party Certified**

Wines made from grapes grown in vineyards transitioning to organic or biodynamic certification -- This category is intended for those vineyards undertaking organic or biodynamic certification that have not yet completed the certification process. Proof of enrollment with third party certification agency (Demeter International, CCOF, Oregon TILTH, or France's ECOCERT) must accompany your entry.

3rd Party Certified Wines - This category also includes wines made from grapes with a 3rd party certification such as Lodi Rules, Oregon LIVE and Certified Salmon Safe programs may enter Class 3. A copy of your certification must accompany your entry.

### **Class 4: Natural (International Imports Only)**

International wines made from grapes farmed without the use of chemicals. This category is open to International Imports ONLY. It is intended for those within the International community who have traditionally farmed without the use of chemicals, but who have not sought 3rd party certification. Wineries entering Class 4 must sign an affidavit (provided with the Class 4 Entry Form) that they do indeed farm their grapes without the use of chemicals of any kind. Wineries found to misrepresent themselves under these guidelines will be disqualified.

**For more information on the International Green Wine Competition, to sign up for our mailing list, and for dates of the 2009 competition, please visit [www.greenwinecomp.info](http://www.greenwinecomp.info).**
